PRODUCT OF POLAND

CERTIFIED SUPPLIER

Rear control arm bushing replacement

The puller is designed to enable correct replacement of bushing directly on car without crossmember removal. Through the application of trapezoidal thread the puller

characterises with high durability. To guarantee the best performance and durability it's crucial to use lubricant on bolt and bearing.

1

Before bushing removal it's necessary to remove the seal. Then assemble drive plates.

2

Put it together. During removal check if bushing goes directly through the socket.

3

Remove old bushing and clean the socket.

4

It's crucial to lubricate the socket before new bushing installation.

5

Set the new bushing in socket.

6

Assemble profiles and remove free spaces.

7

During installation check if bushing goes directly to the socket.

8

Correctly pressed in bushing.
